DETAILED ACTION

Specification

The abstract of the disclosure is objected to because it uses the legal phraseology of "Said cylinder" in line 2. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Hefti (1,836,798).

Hefti discloses a cylinder sleeve, wherein the cylinder sleeve 1 includes on one end a contouring 7, one highest rise of the contouring 7 supports the cylinder sleeve 1 in a pressure injection casting tool against a center sleeve, the contouring 7 of the cylinder sleeve 1 corresponds to the negative shape of a contouring 8 of a corresponding cylinder sleeve 2, the contouring 7 of the cylinder sleeve 1 exhibits a phase displaced periodic symmetry with the contouring 8 of the corresponding cylinder sleeve 2, and a deepest recess of the cylinder sleeve 7 extends to the lower bottom dead center of a lower most piston ring.

Allowable Subject Matter

Claims 5-8 are allowed. The improvement comprises dividing out multiple sleeves from a tube by cutting a contouring by using a cutting tool that moves axially relative to the tube while the tube moves circumferentially.

Prior Art

Prior art made of record but not relied upon is considered pertinent to Applicant's disclosure and consists of five patents.

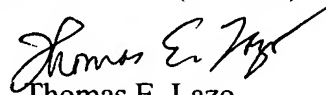

Kramer et al., Kaneko et al., Harley, Schwarz, and Moore are cited to show cylinder liners.
